2020

REBEL^{.22}

*ACTUAL SIZE

REBEL^{.22} **NEW!**

.22 LR JUST GOT BETTER, AND MORE FUN.

Get ready for the most fun you’ve had with a .22LR. Brand new for 2020 we bring you the Rebel. To say that we are extra excited about this one would be an understatement. We have yet to have someone shoot the Rebel and not walk away with a big smile.

Our love of shooting, training, and prepping future shooters were the driving factors of development. We had to bring a quality to this platform which hasn’t been seen before. Aside from its light weight, the Rebel is equipped with a Mission First Tactical pistol blade and threaded barrel with thread protector. The receiver accepts AR-15 pattern stock and brace options, and the trigger and selector are also compatible with AR-15 options.

The Rebel .22 features a monolithic upper receiver and injection molded lower receiver. To top it off, it accepts the widely available 10/22* magazine.

FAILURE IS SIMPLY AN OPPORTUNITY TO BEGIN AGAIN, THIS TIME MORE INTELLIGENTLY.

- HENRY FORD

Failure is the building block of success, and fear of failure keeps most companies building the same products year after year. As patriots, we can't stand by and let "good-enough" dominate our minds. What you don't see, are the countless failures we overcome in order to bring new innovations to market. Every new product is exposed to countless hours of torture, R&D, and user feedback. This ensures we continue to bring innovation to what we love the most, firearms and freedom.

Here's to another decade of innovation!

PROPRIETARY ENHANCEMENTS ONLY FOUND ON A POF-USA RIFLE

POF has positioned itself as the leader in innovation through superior engineering and design in making the AR platform the absolute best it can be. Here are a few things that are 100% unique to POF-USA rifles. This offers a brief insight into the attention to detail we put into everything we do. These are enhancements that no other manufacturer can claim, as most of them prefer their comfort zone of fitting standard parts together instead of delivering reliable innovation to those that need it most; our Patriots.

E² CHAMBERS ARE BUILT INTO EVERY RIFLE WE MAKE

**E2 EXTRACTION
TECHNOLOGY**

POF's patented E² dual-extraction technology consists of four small channels cut into the walls of the chamber allowing a small amount of gas pressure to push against the neck of the spent case. This pressure assists in extraction by breaking the seal between the chamber and case as well as pushing the spent case to the rear as the extractor is pulling to the rear. This removes a tremendous amount of work that would otherwise be left up to the extractor.

The extractor is now pulling on a dislodged cartridge case. With the addition of this feature, your extractor can last up to five times longer than it would in a standard chamber! This push/pull dual extraction system has proven extremely effective in our commitment to increasing the reliability of the AR platform.

ADJUSTABLE GAS SYSTEMS

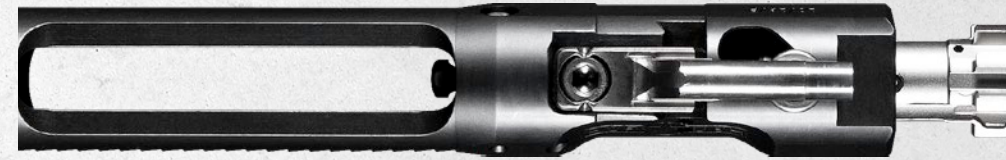

Our gas piston and direct impingement rifles utilize proprietary adjustable gas systems letting you tune your rifle to the exact operating speed it should be, maximized for the environment you're in. Shooting suppressed? Multiple loads of ammo? Turn the gas off? You can do that, and keep your rifle running as smooth as possible.

MODULAR RAILED RECEIVER

The patented Modular Railed Receiver (M.R.R) is POF's crown jewel for precision and extreme rigidity. This is a two piece upper assembly with a free-floating monolithic handguard that slides on and interfaces directly with the upper receiver's reinforced backbone. This backbone is five-times thicker than standard flattop platforms.

The suspended handguard keeps your grip and accessories from weighing on the barrel, and with the help of our heat sink barrel nut, reduces stress and flex in the barrel extension area. This ensures both extreme rigidity and accuracy by directing stress risers toward the upper assembly's strongest, most reinforced materials.

BOLT CARRIER GROUP

Our Key-Lock bolt carrier group is comprised of a Nitride heat treated carrier and stainless steel gas key. The gas key is secured with a staked screw and dove tailed into the carrier for an extremely rigid design. This design helps reduce carrier tilt. Our bolt carrier groups feature a nickel plated bolt & extractor, and chrome plated firing pin. The finishes are both corrosion resistant and introduce lubricious characteristics to the action.

ROLLER CAM PIN

Our patented roller cam pin is a prime example of how we strive to reduce friction and drag in the action. Standard AR cam pins feature a square steel head that literally grinds and carves away at the inside of the receiver. POF's NP3 coated roller head actually rolls inside the channel of the upper, thus eliminating friction and prolonging the life of the upper.

DROP-IN TRIGGER SYSTEMS

Our single stage, non-adjustable drop-in triggers boast crisp 3.5, 4, and 4.5 pound pull weights. They are assembled in aluminum housings complete with urethane feet and are ready for competition, hunting, and tactical applications right out of the box. The trigger, disconnect, and hammer are wire EDM cut from American A2 tool steel and are all nitride heat-treated for ultimate strength and corrosion resistance. All POF triggers come with KNS Precision® stainless steel non-rotating anti-walk pins specifically designed for our ambidextrous lower receivers.

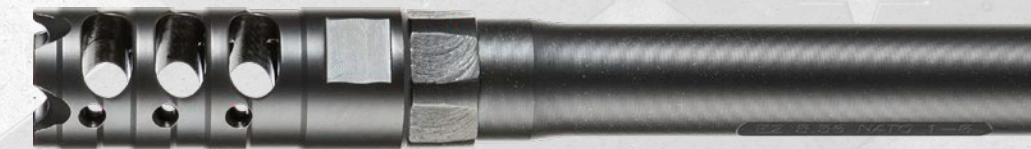

OVERSIZED HEAT SINK BARREL NUT

The patented oversized heat sink barrel nut is one of our most significant innovations that distinguishes POF from the competition. At three inches long it completely encompasses the chamber and throat area of the barrel where expanding gas temperatures peak. When you take into account the radiation properties of aluminum compared to traditional steel, you have 17 times more heat dissipation than a standard AR. Our barrel nut's 3" length also gives the operating rod substantial guiding surface assuring constant positive contact with the bolt carrier. Our enhanced backbone receiver also moves the upper's natural stress point forward. This adds a massive amount of rigidity to the overall platform and is critical when vertical fore grips are being pulled on the upper assembly.

ANTI-TILT BUFFER TUBE

Our MIL-SPEC aluminum anti-tilt buffer tube features "carrier cradle" extensions to ensure that the carrier is always supported by the buffer tube even when the bolt carrier is fully forward. This prevents carrier tilt and premature wear of the buffer tube. The buffer detent now doubles as a lock that inhibits the buffer tube from rotating and becoming loose under adverse conditions. The anti-tilt buffer tube also features three drain holes.

TRIPLE PORT MUZZLE BRAKE

Designed to precisely compliment the POF platform our nitride heat-treated muzzle brake controls gas dispersion and reduces muzzle rise. It is effective in allowing the shooter to have faster follow up shots and has unbelievably soft felt recoil. It features blunt strike prongs and includes our nitride heat-treated collar jam nut.

NITRIDE HEAT-TREATED BARREL

Proper gas regulation and lubricated mechanics are nothing without the precision and durability of a quality barrel. Our button pulled chrome-moly 5R barrels feature polygonal rifling for superior range, bullet velocity, and accuracy. They are then nitride heat-treated for the ultimate in strength, wear resilience, and corrosion resistance.

American INGENUITY

5.56 BUFFER & ANTI-TILT EXTENSION TUBE
AR-15 parts are featured throughout the Rogue, such as the buffer, charging handle, bolt carrier, and barrel nut. Plus, it features our anti-tilt buffer tube which prevents carrier tilt and premature wear on the buffer tube.

AMBIDEXTROUS QD ENDPLATE
Easily attached your sling on either side. Built in anti-rotation feature.

AMBIDEXTROUS SELECTOR
Easy safety manipulation for right and left handed shooting.

REVOLUTION DI 5.56 BOLT CARRIER
Like the Revolution DI, The Rogue uses a 5.56 bolt carrier resulting in less mass and reduced recoil. It also uses our patented roller cam pin for reduced friction on the upper receiver.

RENEGADE HANDGUARD & HEAT SINK BARREL NUT
Featuring the slim Renegade handguard with multiple QD points and patented heat sink barrel nut for more effective heat dissipation.

MATCH GRADE STAINLESS STEEL BARREL WITH SINGLE PORT MICRO-B MUZZLE BRAKE
Featuring our patented E² dual extraction technology. With this feature your extractor can last up to five times longer than in a standard chamber.

MIDLENGTH GAS BLOCK
Midlength gas system for smoother shooting and enhanced reliability.

The Rogue pistol weighs just 5.6 pounds!

NEW!

We've done it again. We've bested our lightest .308 rifle, the Revolution DI, by almost a full pound, and that's saying something. The Rogue weighs in at just 5.9lbs, making it the lightest .308 AR in the world.

ROGUE

IT'S ABOUT THE WEIGHT, AND SAVINGS.

Project "Rogue" was an exercise to turn the Revolution platform into the lightest .308 semi auto rifle on the market, and to do it without needless "lightening" cuts. All while delivering a rifle at a price point affordable to serious shooters.

The result is a sub 6 pound .308 rifle packed with proprietary and patented innovations. Thanks to its ridiculously light weight, never before has a semi auto .308 been a more realistic option to carry in the field, no matter how far the journey.

The Rogue features a stylized forged receiver set, stainless steel match grade barrel, Revolution DI BCG, ambidextrous selector, multiple QD sling attachment points, and Renegade rail & oversized heatsink barrel nut, all topped off with our Micro B muzzle brake.

ROGUE	CALIBER	BARREL	HANDGUARD	WEIGHT	COLOR/PART #

The American
REVOLUTION

5.56 BUFFER &
ANTI-TILT EXTENSION TUBE

AR-15 parts are featured throughout the Revolution DI, such as the buffer, charging handle, bolt carrier, and barrel nut. Plus, it features our anti-tilt buffer tube which prevents carrier tilt and premature wear on the buffer tube.

FULLY AMBIDEXTROUS
CONTROLS

No matter your shooting side or style, ergonomic ambi controls are built in to the billet upper and lower receivers, even our Tomahawk ambi charging handle is included. The upper receiver is dimensionally the same size as a MIL-SPEC 5.56.

UTILIZES A 5.56 BOLT CARRIER

We've created a .308 that uses a 5.56 bolt carrier resulting in less mass and reduced recoil. It also uses our patented roller cam pin for reduced friction on the upper receiver. Reinforced metallurgy in the bolt provides additional strength and pressure resilience to the sidewalls of the bolt face by using a proprietary alloy.

RENEGADE HANDGUARD &
HEAT SINK BARREL NUT

The Revolution DI features our Renegade handguard with multiple QD points and patented oversized heat sink barrel nut for more effective heat dissipation.

NITRIDE HEAT TREATED
FLUTED BARREL

The Revolution DI barrel features our patented E² dual extraction technology. With this feature your extractor can last up to five times longer than in a standard chamber.

9-POSITION RIFLE LENGTH
DICTATOR GAS BLOCK

Easily tune for your ammo, environment, or silencer.

TRIPLE PORT MUZZLE BRAKE

Effectively reduces felt recoil and muzzle rise.

Available in 6.5 Creedmoor
and pistol configurations

MATCH GRADE TRIGGER
4.5lb curved POF Drop-in trigger
with KNS anti-walk pins.

Based off of our original award winning Revolution, The Revolution DI is still a .308 battle rifle that is the same size as your AR-15. This time, the Revolution DI features our 9-position rifle length Dictator Gas Block.

REVOLUTION
DIRECT DI IMPINGEMENT

NOW IN DIRECT IMPINGEMENT!

We broke barriers and won awards when we released the piston driven .308 Revolution. By popular demand, The Revolution DI provides the same technology, same durability, same features, and same AR-15 size, but in a smaller direct impingement system featuring our 9-position adjustable Dictator gas block and Renegade rail. There is virtually nothing left to upgrade.

The original Revolution weighed in at a paltry 7.35 pounds, turning heads for its incredible light weight and small stature for a .308. The Revolution DI weighs even less at 6.81 pounds with a 16" barrel, making it ideal for just about any situation you put it in.

REVOLUTION DI	CALIBER	BARREL	HANDGUARD	WEIGHT	COLOR/PART #

NITRIDE HEAT TREATED FLUTED BARREL
The Revolution fluted barrel features our patented E² dual extraction technology. With this feature your extractor can last up to five times longer than in a standard chamber.

5-POSITION RIFLE LENGTH ADJUSTABLE GAS PISTON
Easily tune for your ammo, environment, or silencer. Piston systems trap hot gasses and carbon in the gas block, allowing the rifle to run cooler, cleaner and longer.

OVERSIZED TRIPLE PORT MUZZLE BRAKE
Effectively reduces felt recoil and muzzle rise.

Available in 6.5 Creedmoor and pistol configurations

MATCH GRADE TRIGGER
4.5lb curved POF Drop-in trigger with KNS anti-walk pins.

American engineering and innovation led us to create the Revolution, a .308 battle rifle that employs our tried-and-true gas piston system. Thanks to this .308 using a 5.56 bolt carrier, the receiver and overall measurements are the same as a 5.56. A first for the industry, setting a new standard for .308 battle rifles.

REVOLUTION

PISTON **PD** DRIVEN

THE REVOLUTION IS THE SAME SIZE AS YOUR AR-15

THE REVOLUTION™ IS OUR .308 RIFLE THAT HANDLES LIKE A 5.56 – BECAUSE IT’S THE SAME SIZE AND WEIGHT AS ONE. This isn’t a stripped down rifle that’s saving weight by making extra cuts or lacking the battle rifle features you’re accustomed to. We’ve worked Patriot magic into the Revolution by using a 5.56 bolt carrier and other 5.56 parts allowing for a shorter overall receiver size and reduced weight.

THE REVOLUTION IS NOT A SMALL FRAME .308, IT’S SMALLER! The Revolution features many 5.56 parts; such as an ambidextrous charging handle, bolt carrier, cam pin, buffer, heat sink barrel nut, handguard, and 5-position gas piston operating system. The barrel extension, bolt assembly, upper, and lower receiver are the exact same size as those on an AR-15. This is truly an AR-15 that shoots in .308!

Weighing in at 7.3 lbs, the Revolution features our new Edge handguard with four built-in QD mounts, and is packed with all you’ve come to expect from POF. Fully ambidextrous billet receiver set, high-phosphorus nickel coated bolt carrier group, 5-position adjustable gas piston, single stage match grade trigger, and more. With our redesigned triple port muzzle brake recoil management is not an issue. YOU HAVE JUST FOUND YOUR “ONE GUN.”

The American
STANDARD

ANTI-TILT EXTENSION TUBE

Anti-tilt buffer tubes grab the buffer detent to eliminate stock rotation, prevent carrier tilt in piston driven rifles by supporting the back of the carrier, as well as reducing wear and tear both on the bolt carrier and the buffer tube.

FULLY AMBIDEXTROUS CONTROLS

Built on the Gen 4 lower, the P415 is ergonomic no matter your shooting side or style.

ONE PIECE BOLT CARRIER

High-phosphorus nickel coated bolt carrier, chrome plated bolt, extractor, and firing pin for corrosion resistance.

MODULAR RAILED RECEIVER & HEAT SINK BARREL NUT

Featuring our new slimline Edge handguard with multiple QD points and patented oversized heat sink barrel nut for more effective heat dissipation.

NITRIDE HEAT TREATED BARREL

4150 chrome vanadium alloy barrel featuring our patented E² dual extraction technology. With this feature your extractor can last up to five times longer than in a standard chamber.

5-POSITION MIDLENGTH ADJUSTABLE GAS PISTON

Easily tune for your ammo, environment, or silencer. Piston systems trap hot gasses and carbon in the gas block, allowing the rifle to run cooler, cleaner and longer.

TRIPLE PORT MUZZLE BRAKE

Nitride heat treated muzzle brake effectively reduces felt recoil and muzzle rise.

MATCH GRADE TRIGGER

4.5lb curved POF Drop-in trigger with KNS anti-walk pins.

P415
EDGE

UNSTOPPABLE IN UNFAVORABLE CONDITIONS

The P415 was engineered to be virtually unstoppable in unfavorable conditions. It is a product of continuous development and improvement to the AR platform that no other rifle company has attempted or succeeded at.

The reliability has been tested time after time, and the operating system perfected. E² Extraction Technology, complete ambidextrous fire controls, modular free floating rail platform, and numerous internal improvements make it the pinnacle of all-purpose 5.56 caliber sporting rifles. The P415 simply will not fail when you need it most.

P415 EDGE	CALIBER	BARREL	HANDGUARD	WEIGHT	COLOR/PART #

American INNOVATION

When we decided to make a direct impingement rifle, it couldn't be another "me-too" carbine. The Renegade+ embodies everything a direct impingement AR-15 can be.

Pistols available in
▲ .300BLK and 5.56

▼ Renegade+ uppers available in 5.56 & .300BLK. Uppers Work with your MIL-SPEC lower! See page 21.

RENEGADE+

THE DIRECT IMPINGEMENT RIFLE THAT EXCEEDS ALL EXPECTATIONS

The Renegade+ addresses every weak point of the direct impingement system. Platform advancements such as our roller cam pin and patented heat sink barrel nut go well above mere aesthetics often found in rifles today.

The Dictator 9-position adjustable gas block gives you ultimate control of your rifle, whether tuning for ammo load or suppressor use. The straight gas tube eliminates heat build up from the weak points of standard gas tubes. And the roller cam pin ensures a smooth and more reliable relationship with the upper receiver.

Featuring our Gen 4 billet lower receiver and Keylock Bolt Carrier Group, this receiver is completely ambidextrous and includes our flat 3.5 lb match grade trigger. Competition ready right out of the box. The magic in the upper receiver is held within our Keylock Bolt Carrier Group which is Nitride heat treated for maximum protection & reliability and features a keylocked gas key and single screw. The Renegade+ comes with our M-LOK compatible Renegade rail, covering the 16.5" nitride heat treated barrel.

Homegrown Patriotism

Minutemen were civilian colonists tasked with being a defensive force to be prepared at a moments notice. They took it upon themselves to be trained in various weapons and tactics. We deeply admire their patriotism and self-reliance. The “Minuteman” is our twist on what a direct impingement sporting carbine should be, topped with the controls and enhancements most important to remain mobile and light.

The Minuteman has everything a respectable rifle needs and nothing it doesn’t. Mount your favorite optic and the Minuteman is ready for the range or the field right out of the box. Go ahead and stack these features up to your favorite “other brand” carbine. We think you’ll be impressed.

FOR THE AFICIONADO

It's time the Patriot Ordnance Factory militia had a taste of a POF-USA handgun. We've combined our upgraded Glock® 19 compatible slide with upgraded internals and developed our own frame optimized for enhanced grip and handling.

The slide is machined from 17-4 stainless steel with a Nitride heat treated Finish for maximum environmental protection. It also features an optics plate that will fit the Trijicon® RMR footprint, and ships with a fiber optic front sight and blacked out rear sight.

The frame features a flared magwell, contoured grip, interchangeable backstraps, enhanced mag release, slide stop guard, extended beaver tail, enlarged trigger guard, forward thumb ledges, and more.

Now for the ultimate package, we've combined them together with our Nitride match grade barrel, built them out with upgraded internals, and delivered a complete pistol that shooters of all levels will appreciate.

SO MUCH MORE THAN MIL-SPEC

We look at every weak point of a MIL-SPEC rifle as an opportunity to innovate. Many of these parts are integrated into our rifles, which help set us apart from everyone else in the industry. With our ever-expanding accessory lineup, you can upgrade your standard MIL-SPEC carbine with genuine POF-USA parts. Our parts and accessories make your carbine run smoother, with increased reliability, and better ergonomics.

For example, our Renegade Rail is not only comfortable with multiple QD attachments and M-LOK compatibility, it also features our heat-sink barrel nut which dissipates heat 17 times faster than a standard MIL-SPEC barrel nut.

Our new bolt carrier group is a must for any serious shooter. From its keylock designed gas key and Nitride heat treat, to its nickel plated bolt and patented Roller Cam Pin, your rifle will enjoy an immediate boost in reliability.

This is just a sampling of our accessory offerings and it continues to grow. Any MIL-SPEC rifle will benefit from these upgrades.

Single stage 4lb: #00516
Two stage 2lb/2.5lb: #01511

STRAIGHT TRIGGER SYSTEM
Single stage 3.5lb: #00858
Two stage 2lb/2lb: #01510

KEY-LOCK BOLT CARRIER GROUP
The keylock design of this bolt carrier group is staked and bolted in, providing superior gas key stability. The carrier is Nitride heat treated for the ultimate in heat & pressure tolerance, lubricity, and wear resilience. Our bolt carrier groups feature a nickel plated bolt & extractor, and chrome plated firing pin. *For direct impingement rifles. Fits MIL-SPEC upper receivers.

NEW! 5.56: #01650
