Eliminate stock rotation and prevent carrier tilt by supporting the back of the carrier, as well as reducing wear and tear on the bolt carrier and the buffer tube.

## EXCEED ALL EXPECTATIONS

The Renegade+ addresses every weak point of the direct impingement system. Platform advancements such as our roller cam pin and patented heat sink barrel nut go well above mere aesthetics often found in rifles today.

The Dictator 9-position adjustable gas block gives you ultimate control of your rifle, whether tuning for ammo load or suppressor use. The straight gas tube eliminates heat build up from the weak points of standard gas tubes. And the roller cam pin ensures a smooth and more reliable relationship with the upper receiver. Featuring our Gen 4 billet lower receiver and Keylock Bolt Carrier Group, this receiver is completely ambidextrous and includes our flat 3.5 lb match grade trigger. Competition ready right out of the box. The magic in the upper receiver is held within our Keylock Bolt Carrier Group which is Nitride heat treated for maximum protection & reliability and features a keylocked gas key and single screw. This Black Label Exclusive Renegade+ comes with our M-LOK compatible Renegade rail, covering the 13.75" nitride heat treated barrel.
