ORIGINAL.**

OUR NORTH STAR

We are all born free. Free to be our best.

That's America's truth. What's yours?

We each bring something different to the table.
Some, are dreamers. Others, doers. We are both.

We are inventors. Engineers. Always have been.
Always will be.

We know nothing compares to a hard day's work.
To getting up before the sun and getting it done.

Take our sleeves, and roll 'em up.

Red, white and blue. Blood, sweat and tears.

It's who we are. It's what we do. Every day.

Show up. Buckle down. Give a damn.

Because we're not making the next best thing.
We're making THE best thing. Like they used to.

Only better. Building the first of many firsts.
Making what has yet to be imagined. That's our
truth. What's yours?

FELLOW PATRIOTS,

As we reflect on our journey over the past 23 years, we are filled with gratitude for your unwavering support. When we first opened our doors, we faced a crucial decision that would shape the essence of our business - whether to work with American manufacturers or source our products overseas.

In a landscape where international sourcing seemed more convenient and cost-effective, we made a conscious choice to support American workers and businesses. Despite the allure of higher profits and lower costs, we understood that the true cost of neglecting our American workforce was far greater than any financial gain.

For us, supporting American-made businesses wasn't just a business decision; it was a moral imperative. We firmly believe that American makers matter. We recognize the immense value they bring to our economy and communities, and we are committed to doing our part in sustaining and fostering their growth.

Running a small business comes with its challenges, both in terms of strategy and cost. Yet, we remain steadfast in our commitment to prioritizing American-made products. We take pride in choosing quality over everything, even if it means sacrificing higher profit margins. Every product we offer is a testament to our dedication to supporting American craftsmanship and ingenuity.

We are heartened to see a shift in consumer consciousness towards supporting small businesses and the individuals who rely on them. Together, we are witnessing the resurgence of American manufacturing, with new jobs being created and manufacturing plants opening across the country. This revitalization is a testament to the power of consumer choice and the impact it can have on our economy.

We are proud to declare that all our products are proudly made in America. Whether it's in our own factory or sourced from American manufacturers and suppliers, we remain committed to upholding the highest standards of quality and craftsmanship.

As we continue on this journey, we extend our deepest gratitude to you, our valued customers, for your continued support. Your choice to support American-made businesses makes a tangible difference in the lives of countless individuals and communities across our nation.

Thank you for choosing to be a part of our story and for joining us in our mission to champion American craftsmanship.

Tracy Desomma
President
POF-USA

FOUNDED ON INNOVATION

PROPRIETARY ENHANCEMENTS

POF-USA has positioned itself through superior engineering and design in making the AR platform the absolute best it can be. Each rifle is built with technology that is 100% unique to POF-USA rifles. These enhancements are explained in detail on our website (scan to read). These are enhancements that no other manufacturer can claim, as most of them prefer their comfort zone of fitting standard parts together instead of delivering reliable innovation to those that need it most - our Patriots.

LEARN MORE

ANTI-TILT BUFFER TUBE

Our mil-spec aluminum anti-tilt buffer tube features “carrier cradle” extensions to ensure that the carrier is always supported by the buffer tube even when the bolt carrier is fully forward. This prevents carrier tilt and premature wear of the buffer tube. The buffer detent now doubles as a lock that inhibits the buffer tube from rotating and becoming loose under adverse conditions. The anti-tilt buffer tube also features three drain holes.

KEYLOCK BOLT CARRIER GROUP + ROLLER CAM PIN

Our Keylock Bolt Carrier Group is a Nitride heat treated carrier with stainless-steel gas key. It is secured with a staked screw and dove tailed into the carrier for an extremely rigid design that helps reduce carrier tilt.

Standard AR cam pins feature a square steel head that literally grinds and carves away at the inside of the receiver. POF-USA’s nickel coated roller head actually rolls inside the channel of the upper thus eliminating friction and prolonging the life of the upper.

GEN 4 LOWER RECEIVER

The Gen 4 lower is the best of the best, no matter your shooting side or style. POF-USA redesigned the lower receiver from the ground up, not only improving the ergonomics and fitment, but also making it fully ambidextrous. Featuring a strong hand bolt hold open and release, receiver tension screws, integrated QD cups, a flared magwell, and oversized trigger guard, the Gen4 Lower Receiver is the ultimate building platform.

E² DUAL-EXTRACTION TECHNOLOGY

POF-USA's patented E2 dual-extraction technology consists of four small channels cut into the walls of the chamber allowing a small amount of gas pressure to push against the neck of the spent case. This pressure assists in extraction by breaking the seal between the chamber and case as well as pushing the spent case to the rear as the extractor is pulling to the rear. This removes a tremendous amount of work that would otherwise be left up to the extractor.

OVERSIZED HEAT SINK BARREL NUT

The patented oversized heat sink barrel nut is one of the most significant innovations. At three inches long it completely encompasses the chamber and throat area of the barrel where expanding gas temperatures peak. Take into account the radiation properties of aluminum compared to traditional steel and you have 17 times more heat dissipation than a standard AR. Our barrel nut's 3" length also gives the operating rod substantial guiding surface assuring constant positive contact with the bolt carrier.

MOA GUARANTEE

All of our rifles are MOA guaranteed. You can count on your POF-USA firearm when your shot has to count.

MODULAR RAILED RECEIVER [M.R.R.]

The patented Modular Railed Receiver (M.R.R) is POF-USA's crown jewel for precision and extreme rigidity. This is a two-piece upper assembly with a free-floating monolithic handguard that slides on and interfaces directly to the upper assembly thanks to our upper's reinforced backbone. This backbone is five-times thicker than standard flattop platforms. The suspended handguard keeps your grip and accessories from weighing on the barrel, providing for the most secure free-floated barrel on the market, and has more than 6 points of attachment securing the rail from experiencing any movement under stress.

MODERNIZED LEVER ACTION RIFLE

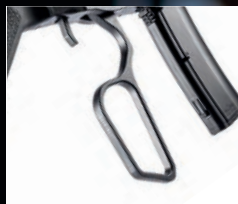

The Tombstone's compact overall length is just 36" and comes in at an ultra-lightweight 5.75lbs (unloaded weight). The proprietary trigger design features a smooth pull, and crisp break of 3.5lbs. The 16.5" free-floating 4150 steel barrel is complimented by POF's 10.5" Modular Receiver Rail (M.R.R.), with M-Lok slots at the 3, 6, 9, and a 2" picatinny rail at the 6 & 12 position. The integrated XS Ghost Ring sights allow for quick target acquisition and POF's removable dual port muzzle brake is ideal for fast follow-up shots.

THE AMERICAN REVOLUTION

The REVOLUTION uses a 5.56 bolt carrier and other 5.56 parts allowing for a shorter overall receiver size and reduced weight. This also isn't a normal small frame .308, it's smaller! It features many 5.56 parts; such as charging handle, bolt carrier, cam pin, buffer, heat sink barrel nut, handguard, and 5-position gas piston operating system. The barrel extension, bolt assembly, upper, and lower receiver are the exact same size as those on an AR15. Weighing in at 7.3 lbs. The Revolution features our new Edge Handguard with four built-in QD mounts, and is packed with all you've come to expect from POF-USA. Fully ambidextrous billet receiver set, nickel plated bolt carrier, 5-position adjustable gas piston, single stage match grade trigger, and more.

THE AMERICAN REVOLUTION

We broke barriers and won awards when we released the piston driven .308 Revolution. By popular demand, The Revolution DI provides the same technology, same durability, same features, and same AR-15 size, but in a smaller direct impingement system featuring our 9-position adjustable Dictator gas block and Renegade rail. There is virtually nothing left to upgrade. The original Revolution weighed in at a paltry 7.35 pounds, turning heads for its incredible light weight and small stature for a .308. The Revolution DI weighs even less at 6.8 pounds with a 16" barrel, making it ideal for just about any situation you put it in.

ITS ABOUT THE WEIGHT AND THE SAVINGS

Project "Rogue" was an exercise to turn the Revolution platform into the lightest .308 semi auto rifle on the market, and to do it without needless "lightening" cuts. All while delivering a rifle at a price point affordable to serious shooters. The result is a sub 6 pound .308 rifle packed with proprietary and patented innovations. Thanks to its ridiculously light weight, never before has a semi auto .308 been a more realistic option to carry in the field, no matter how far the journey. The Rogue features a stylized forged receiver set, stainless steel match grade barrel, Revolution DI BCG, ambidextrous selector, multiple QD sling attachment points, and Renegade rail & oversized heatsink barrel nut, all topped off with our Micro B muzzle brake.

EXCEED ALL EXPECTATIONS

When we decided to make a direct impingement rifle, it couldn't be another "me-too" carbine. The Renegade + is built off of our Gen 4 billet lower receiver. This receiver is completely ambidextrous and includes our flat 3.5 lb match grade trigger with KNS Precision anti-walk pins. The Renegade + comes with our M-LOK compatible Renegade rail, covering the 16.5" nitride heat treated barrel.

READY AT A MOMENTS NOTICE

Minutemen were civilian colonists tasked with being a defensive force to be prepared at a moments notice. They took it upon themselves to be trained in various weapons and tactics. We deeply admire their patriotism and self-reliance. The "Minuteman" is our twist on what a direct impingement sporting carbine should be, topped with the controls and enhancements most important to remain mobile and light.

The Minuteman has everything a respectable rifle needs and nothing it doesn't. Mount your favorite optic and the Minuteman is ready for the range or the field right out of the box. Go ahead and stack these features up to your favorite "other brand" carbine. We think you'll be impressed.

ABOUT PSG-22

Our love of shooting, training, and prepping future shooters were the driving factors of development. We had to bring a quality to this platform which hasn't been seen before. Aside from its light weight of just over 3lbs, the PSG 22 is equipped with a rear Q.D. mount for single point slings, Enhanced Pressure Device, and threaded barrel ready for your suppressor. The receiver accepts AR-15 pattern stock and brace options, and the trigger and selector are also compatible with AR-15 options. The PSG 22 features a monolithic upper receiver and injection molded lower receiver. To top it off, it accepts the widely available 10/22[®] magazine.

ACCESSORY PARTS

MIL-SPEC UPGRADES

QUIT SETTling FOR "GOOD ENOUGH"

When it's time to enhance your AR, look no further than POF-USA. Our proprietary parts are available on their own, empowering you to upgrade to some of the best accessories on the market. See more at POF-USA.com

LEARN MORE

AMBI CHARGING HANDLES

Billet machined to exacting standards. Full ambi, and finished with type-III hardcoat anodizing.

ANTI-TILT BUFFER TUBE

Eliminate stock rotation and prevent carrier tilt by supporting the back of the carrier, as well as reducing wear and tear on the bolt carrier and the buffer tube.

OVERSIZED BOLT CATCH

KEYLOCK BOLT CARRIER GROUP

Ultimate Durability. Keylocked, staked, and bolted in. This carrier provides superior gas key stability.

DICTATOR ADJUSTABLE GAS BLOCK

Our 9-position adjustable gas block features a straight tube to reduce heat build up.

MUZZLE BRAKES, FLASH HIDERS, AND LOCK NUTS

ROLLER CAM PIN UPGRADE

Never worry about cam slot wear again. Cam Pin upgrade kit features a rounded pin for reduced drag.

SINGLE STAGE & MATCH TRIGGERS

4lb Single Stage EFP POF Drop-in trigger with KNS anti-walk pins.

4.5lb Curved POF Drop-in trigger with KNS anti-walk pins.

3.5lb Straight POF Drop-in trigger with KNS anti-walk pins.

M-LOK HANDSTOP KIT

Specifically designed for use on M-LOK compatible rail systems. Includes mounting hardware.
